

MISSIYA 4 · BONUS

Atmosfera

Raketani uchirib, 5 qatlamning hammasidan o'tib bor.

🕒 20 daqiqa · 7–10 yosh

KERAKLI NARSALAR

Oq karton A4

Qaychi

Yelim-qalam

Pichoq*

Qalamlar

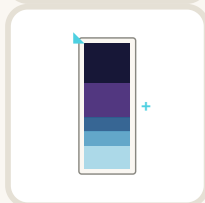

* 3-bosqichda kattalar yordami kerak
+ Varaq 2 (sprite-lar) va Varaq 3 (atmosfera)

BOSQICHLAR

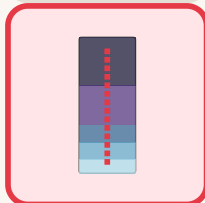

1-bosqich

Varaq 2dagi qatlam aholisini bo'yab oling va konturi bo'yicha qaychi bilan kesib oling.

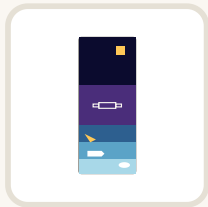

2-bosqich

Varaq 3ning orqa tomoniga yelim-qalam surting va uni butunligicha oq kartonga yopishtiring.

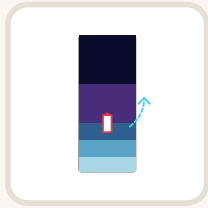

3-bosqich **KATTALAR**

Kattalardan iltimos qiling — **aniq markazdan** yuqoridan pastga, 5 qatlam orqali tor tirqish kessin.

4-bosqich

Aholini va qatlam nomlarini tirqishning **ikki tomoniga** yopishtiring. Termosferadagi XKS ni shunday yopishtiringki, tirqish uning markazidan o'tsin.

5-bosqich

Raketani yig'ing: orqasiga tayoqchani va dastakni yopishtiring. Tayoqchani tirqishdan o'tkazib, raketani butun atmosfera orqali yuqoriga harakatlantiring!

BILASIZMI?

Aslida **ekzosfera troposferadan 800 marta qalin** — biz havoning eng tor qatlamida yashaymiz. Agar qatlamlarni haqiqiy o'lchamda chizganimizda, troposferani umuman ko'rmasdik!

Mening raketam kosmosga yetib bordi!

4-missiya sprite-lari

ATMOSFERA

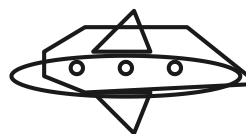

Hammasini bo'yang, keyin punktir bo'yicha kesib, o'z qatlamlariga yopishtiring.

QATLAM AHOLISI

bulut va uy · troposfera

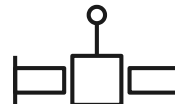

samolyot · stratosfera

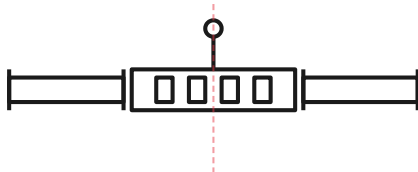

meteor · mezosfera

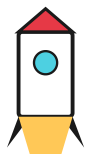

sun'iy yo'ldosh · ekzosfera

XKS · termosfera (katta, tirqish markazidan o'tadi)

RAKETA · TAYOQCHA · DASTAK

TAYOQCHA — uzun chiziq

QATLAM NOMLARI

Troposfera
