BOSQICHLAR

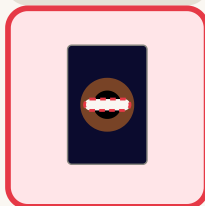

1-bosqich

3-varaqdagi obyektlarni — yorug'lik, yulduz, sayyora, raketani — bo'yab, doira bo'ylab kesib oling.

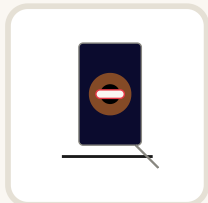

2-bosqich

2-varaqning orqa tomoniga yelim-qalam surting va qora tuynukni oq karton A4 ga yopishtiring.

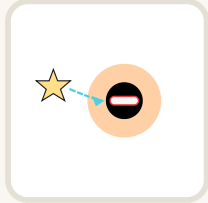

3-bosqich **KATTALAR**

Kattalardan markazdagi qizil chiziq bo'ylab **tirqish kesishni** so'rang — bu hodisalar ufqi.

4-bosqich

Kartonni tik qo'ying (yoki ushlab turing), tirqish orqasida bo'sh joy bo'lsin.

5-bosqich

O'yna! Obyektlarni birma-bir hodisalar ufqi tirqishiga tashla. Ular butunlay yo'qoladi — hatto yorug'lik ham qaytib chiqa olmaydi.

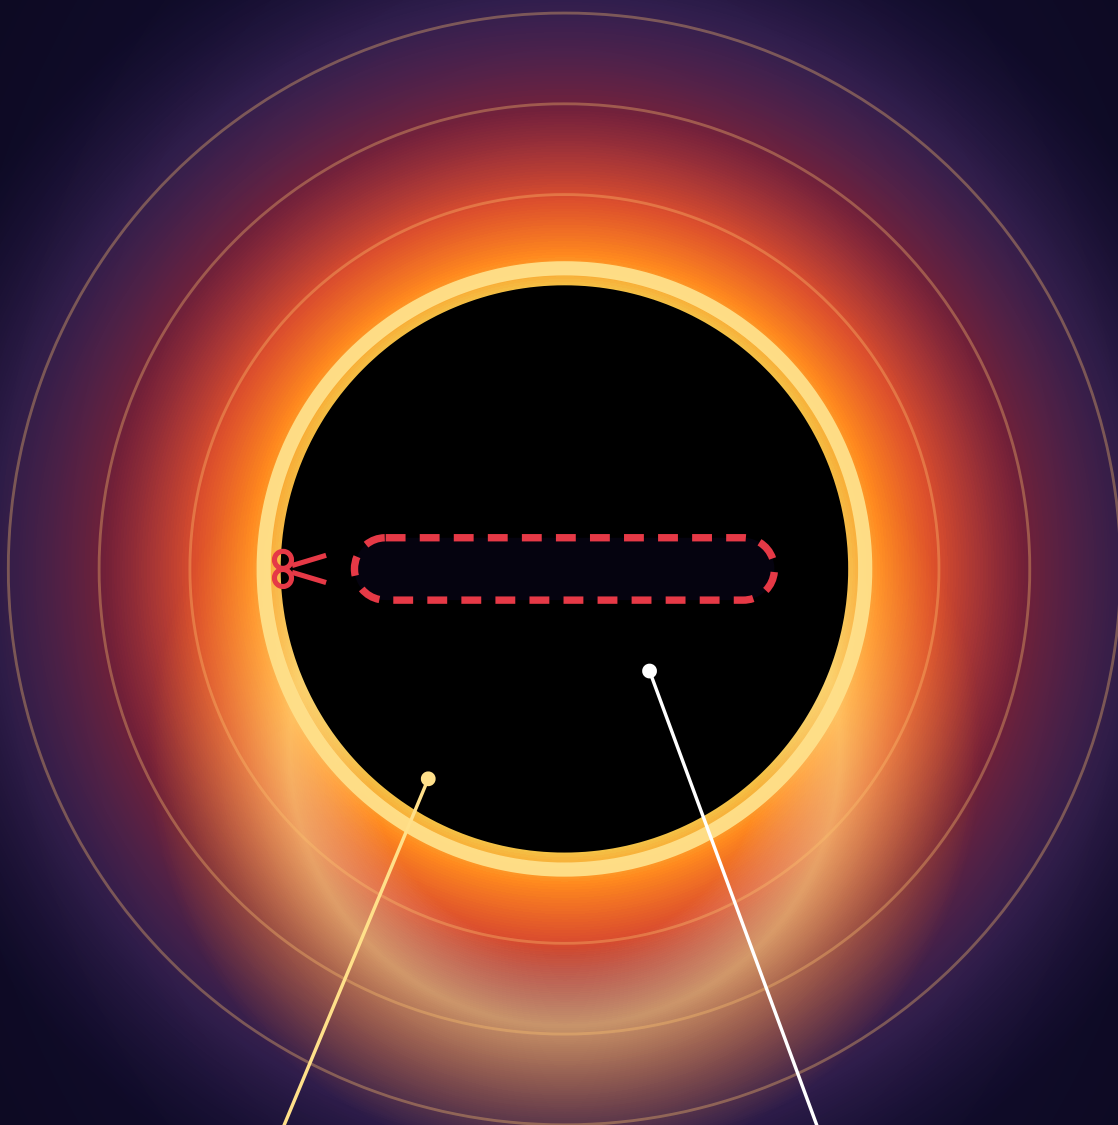

BILASIZMI?

Qora tuynuk shunchalik kuchliki, undan hatto **yorug'lik ham chiqa olmaydi**. Shuning uchun biz uni ko'rmaymiz — faqat atrofidagi qizigan moddaning yorqin halqasini ko'ramiz.

Men barcha obyektlarni qora tuynukka tashladim!
